OVERVIEW

The Briggs & Stratton P3200 is a single phase petrol inverter generator with a maximum output of 3.2kVA (3200W), driven by a Briggs & Stratton 4-stroke engine.

TECHNICAL OVERVIEW

Maximum output	3.2kVA
Phase	Single phase
Fuel tank	5.7 litres
Noise level	58 dB(A) @7m

ENGINE

Engine	Briggs & Stratton 4-stroke
--------	---------------------------------------

DIMENSIONS & WEIGHT

Dimensions (L x W x H)	66 x 35.2 x 51.7 cm
Weight	38.6 kg

STANDARD FEATURES

- An inverter generator converts the engine's output to AC electronically, giving a supply that suits phones, laptops and TVs.
- A maximum output of 3.2kVA (3200W) lets several everyday appliances run together, within the total.
- The 4-stroke engine runs on plain petrol, with its oil held in the engine rather than mixed into the fuel.
- Noise is 58 dB(A) measured at 7 m, a figure you can compare with other generators quoted at the same distance.
- Single phase output suits household and caravan appliances rather than three phase equipment.
