

50 kVA

OUTPUT

THREE PHASE

330 kg

WEIGHT

OVERVIEW

The TRACTORPACK-050 is a three phase tractor PTO generator with an output of 50 kVA. It is an alternator driven through the tractor's power take-off (PTO) shaft instead of by an engine of its own, so the tractor supplies the power.

TECHNICAL OVERVIEW

Output	50 kVA
Warranty	12 months

DIMENSIONS & WEIGHT

Dimensions (L x W x H)	95 x 45 x 85 cm
Weight	330 kg

STANDARD FEATURES

- A 50 kVA output can run several three phase machines at once, as long as their combined load stays within the rating.
- Three phase output serves three phase motors, such as those on bore pumps, dairy plant and workshop machinery.
- PTO drive means there is no generator engine to fuel, start or service.
- On a PTO alternator the output frequency follows PTO speed, so a tractor held at steady revs gives a steady frequency.
- Backed by a 12 month warranty.
