

60 kVA

OUTPUT

THREE PHASE

360 kg

WEIGHT

OVERVIEW

The TRACTORPACK-060 is a PTO driven alternator with a three phase output of 60 kVA. The tractor's power take-off (PTO) shaft turns it, so the unit has no engine of its own and the tractor provides the power.

TECHNICAL OVERVIEW

Output	60 kVA
Warranty	12 months

DIMENSIONS & WEIGHT

Dimensions (L x W x H)	95 x 45 x 85 cm
Weight	360 kg

STANDARD FEATURES

- A 60 kVA three phase output supports pumps, motors and refrigeration running together within the rating.
- Because the tractor drives it through the PTO, there is no generator engine to fuel, start or service.
- Three phase supply serves three phase equipment such as bore pumps, irrigation motors and refrigeration compressors.
- A PTO alternator's frequency tracks PTO speed, so steady tractor revs mean a steady supply frequency.
- The unit carries a 12 month warranty.
